

## Quality Policy

The Faculty of Computing and Information Technology strives to be a leading entity in offering exceptional educational and administrative services to its students and staff, aiming to prepare graduates with a high level of scientific and research proficiency to fulfill the demands of the job market.

The faculty commits to reaching its objectives by recruiting outstanding educational and administrative personnel, providing a conducive work environment for creativity and excellence, fostering teamwork, and utilizing the latest technologies in its infrastructure while continuously upgrading and enhancing them.

Furthermore, the faculty dedicates itself to self-assessment and administrative oversight of the quality management system, alongside the periodic evaluation of quality goals to guarantee the ongoing improvement and effectiveness of the system in alignment with the international ISO 9001:2015 standard.
